READ CAREFULLY

Wholesale Prices Herewith are for first-class stock, packed free and delivered f. o. b. our local freight and express office.

Terms. Cash with order, or we will ship if one-fourth cash is remitted with order, balance to be paid on arrival.

Small Orders. We cannot fill orders for less than \$1.00.

We Box and Pack Free. These cash prices pay for everything delivered on board the cars. There are no further uncertain charges for service, packing, drayage, etc., as some nurseries charge.

Special Quotations—Estimates. We make special prices on large orders and car lots. Write for estimate, give list of requirements, varieties, grades, etc.

Parcel Post Orders. We can ship 2 to 3 ft. trees by parcel post. Add three (3) cents to the 2 to 3 ft. price and this stock will come to you by mail post paid. We can also ship grapevines, berry plants in the same manner—prices are 3 cents more than listed. However, we prefer express and freight shipments, but make this offer for those far removed from railroads.

All stock damaged in transit, we will replace without charge—claim must be made to us within one week after arrival of stock. We use the utmost care to avoid all mistakes and Myer Trees may be depended upon to bear fruit true to label, but of through error or otherwise, any should prove untrue, we will replace the trees of same size as originally ordered, but are liable in no further manner. Our just and liberal dealing with the public for 50 years is our strongest guarantee to customers.

Special Notice. When buying apple, pear, peach, quince, cherry, plum and apricot the following explanation of Price List should be read carefully:

1000 Rate—300, (or more) of a kind (as 300 apple, 300 pear) but not less than 10 of a variety.

100 Rate—30 (or more) trees of a kind (as 30 apple, 30 cherry), but not less than 10 of a variety.

10 Rate—10 or more of a variety, but if as many as 30 or more, customer is entitled to 100 rate.

Each Rate—Less than 10 of any variety at each rate.

In buying peach trees 100 of one variety go at 1000 rate.

Write your order plainly and with post office address also freight or express office.

FEB 6 - 1917

How to Order

Upon receipt of your order we will mail you a postal card of acknowledgement.

When writing us regarding your order, regardless of how often you may have written us, be sure to sign your full name and address, and if replying to any letter from us, give the date of same.

Inspection. The Certificate of our State Entomologist is attached to all shipments. No diseased or infested trees are permitted in our nurseries.

Order Now. Orders are handled here, as they are received. All orders are especially selected and reserved in customer's name for shipment at the proper time. We always advise prompt, early orders—better for our customers, better for ourselves. Order today—**now!**

Fair and Square Dealing

The honorable reputation of the Bridgeville Nurseries is as dear to us to-day as it has ever been during the generation of time in which we have been building it up. That reputation rests on fair dealing and the intelligent handling of our business, and it is our desire to add to it by supplying stock of all kinds which is absolutely first-class in every particular.

As We Are Extensive Fruit Growers as well as Nurserymen, our selections are made on a different basis from those of the average nurseryman, who is merely a tree-grower. We grow and **fruit**, and our judgment of varieties is based on actual field-trials. We tell you the truth as we know it, and offer trees and plants of just the character we like to plant ourselves.

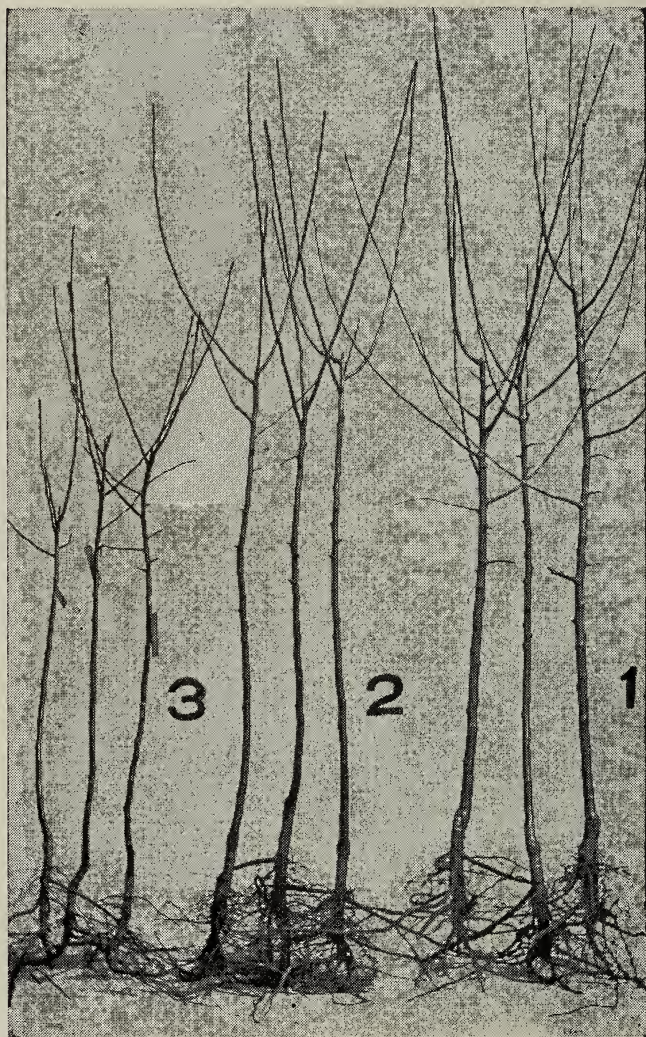

No Agents.—Please notice that we have no agents to call upon you and solicit your orders. This book is our sole solicitor. If you feel disposed to favor us with an order for trees, you will please write your order plainly and mail it to us. We believe our stock and our business methods will commend themselves to you.

No. 2—4½ feet to 6 feet	-	-	Medium Size
No. 3—4 feet to 5 feet	-	-	Small Size

Myer's Trees the Kind to Plant

Apple trees grown right, bear right. **Myer's trees** are hardy, have well ripened wood and are as large at 2 years as most others at three. The knowledge gained in over 45 years of nursery work, as well as the experience of growing fruit for market, is at the service of our customers.

We will be glad to assist anyone in making a proper selection of trees for a certain location.

SPECIAL SELECT LIST OF SUMMER COMMERCIAL VARIETIES

Wm. Early Red. Large striped red, following Transparent.

Yellow Transparent. The earliest white commercial sort.

Liveland Raspberry. About same season as Transparent, clear white with light crimson stripes and shaded a beautiful red on sunny cheek. It is hard to imagine a more attractive apple. Does not blight like Transparent.

Yellow Transparent

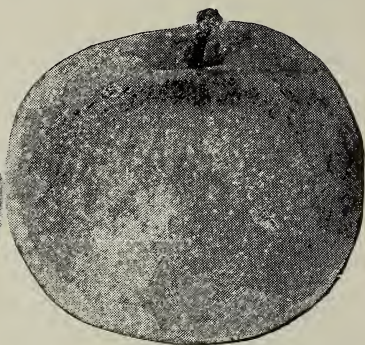

Summer Commercial Varieties—continued

Nyack Pippin. This is without doubt the most profitable summer apple. In the summer of 1916 we picked from twenty trees (\$436.00) four hundred and thirty-six dollars worth of fruit, being 436 7-8 bushel baskets at \$1.00 delivered at Bridgeville depot. A pretty good yield for 1-3 of an acre. This variety is an annual bearer, of the largest and finest quality of any summer apple, and is white, shaded on sunny side.

SPECIAL SELECT LIST OF WINTER COMMERCIAL SORTS

Stayman's Winesap

McIntosh Red

Staymans Winesap, McIntosh Red, Winter Banana, Rome Beauty, York Imperial, Black Twigg, Delicious. The **Stark Delicious**, we think, is the finest winter apple ever introduced. It compares with apples like the **Elberta** to peaches and may take a long time for the planters to find it out. Next comes **Staymans** with **Delicious**, the two will be the great commercial sorts of this state very soon.

The list is a long one and if you will mention what you wish we will supply you if we have them.

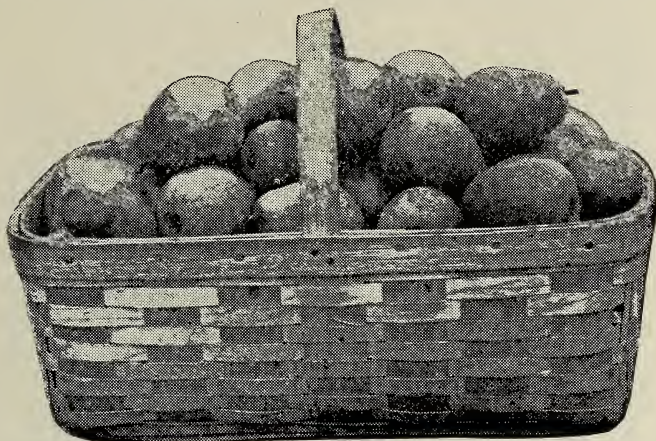

Price of Apple Trees, 2 and 3 year standard sorts.

	Each	10	100	1,000
Bearing size, 6 to 8 ft...	\$.50	\$4.00	\$25.00	\$200.00
First Class, 5 to 6 ft....	35	3.00	20.00	150.00
“ “ 4 to 5 ft....	25	2.00	15.00	125.00
“ “ 3 to 4 ft....	20	1.50	10.00	80.00
One year, 3 to 4 ft.....	25	1.50	10.00	80.00
“ “ 2 to 3 ft.....	20	1.00	8.00	60.00

Nyack Pippin 5c per tree extra worked on Staymans.

Pear production is not in proportion to the demand. There is a vast undeveloped field for the grower who produces pears for his own enjoyment and disposes of his surplus in the home markets, and only in the last few years have orchardists realized the wonderful profits that come from a commercial pear orchard of good varieties.

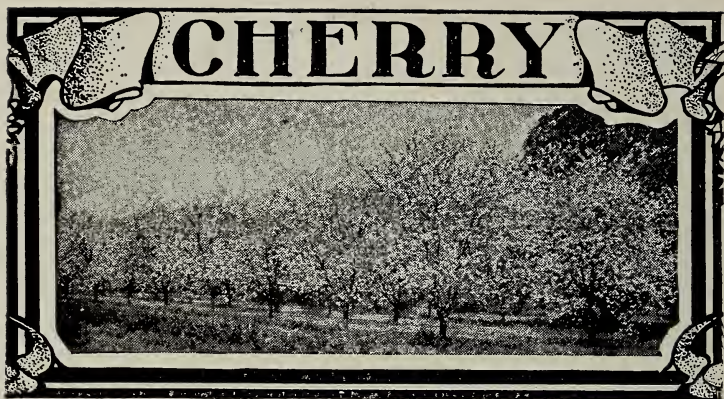

A Basketful of Kieffers

1, 2 and 3 year standard sorts—budded on French or Japan roots.

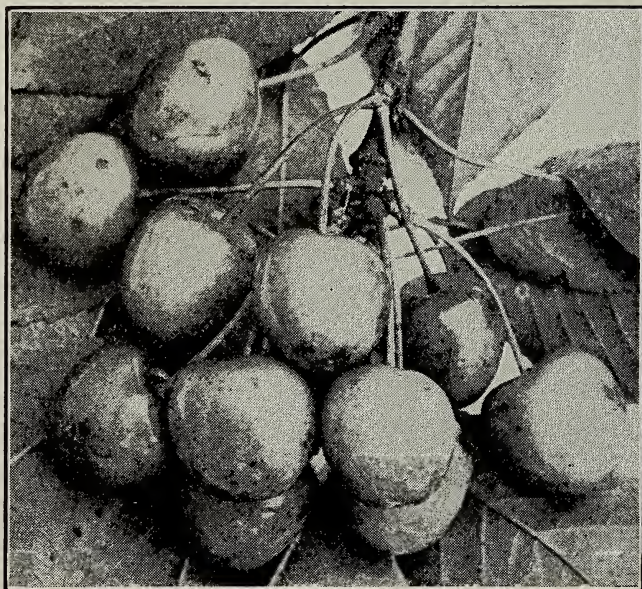

Prices

PEACH

For commercial orchards has been our specialty for forty-five years and in this time we have learned about growing them what many others have yet to learn. We know what these Peach trees will do, because we grow every one of them from the Peach-pit to the finished tree. We do still more, we plant them in our own orchards and fruit them. If they prove a worthless variety for us we do not grow them. Our list of varieties is short and only the select and choice sorts are grown in quantity and listed. We grow a few of each of many undesirable sorts which are not listed in this catalogue to supply a family trade that fancies they must have a tree or two of every known variety.

Eight Select Varieties—All Myer Grown

We know that these are the profit-makers among the hundreds of varieties on the market today:

Bell of Georgia. One of the best quality and most profitable commercial white peaches; ripens just ahead of Elberta.

Carman. Large white with red cheek, ripens after Connett's Early.

Champion. Large, round, white with bright red blush, ripens after Carman.

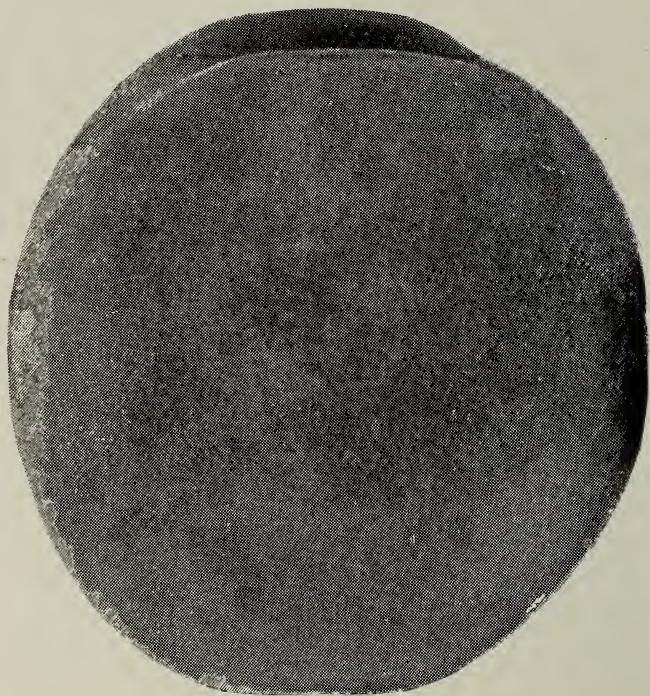

Elberta. Large golden yellow, the great commercial variety the past 20 years.

Gold Finch. Golden yellow, rich blush on sunny side, ripens a week ahead of Elberta and much better quality.

Hale. Large yellow, of finest quality, much superior to Elberta; originated by J. H. Hale, the Peach King, and classed by all peach growers as the best commercial variety yet introduced and when fully known we expect it to displace the well known Elberta, as it ripens about the same time.

Cambridge. Very fine yellow, of Elberta type, ripening ten days earlier; so near like Elberta it will be sold for it in the markets.

Myer's Early Elberta. Rich golden yellow, bright blush on sunny side, high quality, very hardy in bud, ripens 6 to 10 days ahead of Elberta, very valuable market sort.

Hale Peach

**OTHER GOOD COMMERCIAL SORTS ADAPTED
TO DIFFERENT LOCALITIES.**

Greensboro. The largest, most attractive of the early sorts.

Connett's Early. Ripening after Greensboro and ahead of Carman, very fine.

Chair's Choice. Large, yellow, ripening after Elberta.

Francis. Beautiful, yellow, with red blush, large size, after Elberta.

Niagara. Large, yellow, ripening ahead of Elberta.

Reeves Favorite. Very large and of finest quality, ripens with Champion.

Crawfords Late. Large, yellow, follows closely after Elberta.

Mt. Rose. Red, medium size, early.

Old Mixon. Large, red, ripening with Elberta.
Stump. Red, medium size, ripens after Old Mixon.
Smock. Late, yellow, medium size.
Late Elberta. Large, yellow, very fine, ripening after Elberta.
Heath Cling. Large, white, late, cling.
Ray. Very much like Bell of Georgia, ripening about same time.

Price List of Peach trees grown from natural pits, budded from healthy trees by the Myer Method, which insures as good as are possible to propagate.

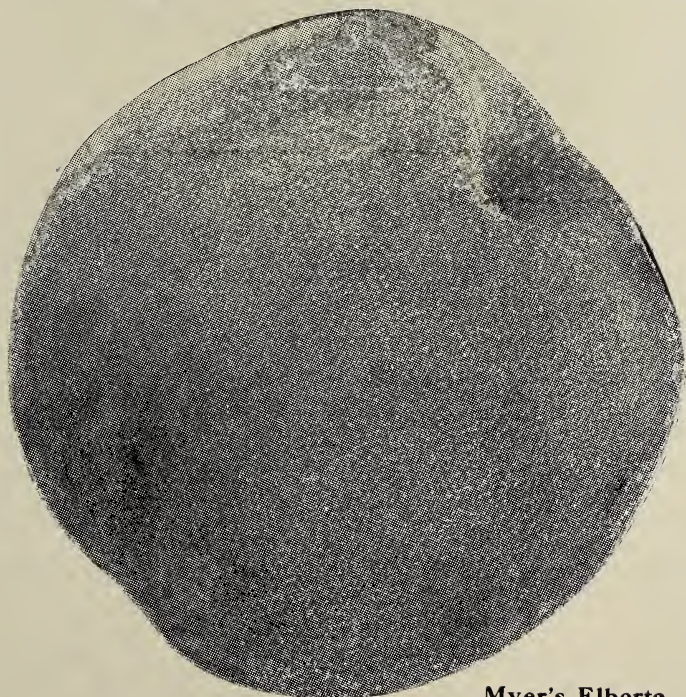

Peaches, 1 year standard sorts.

	Each	10	100	1,000
First class, 5 to 6 ft.....	\$.25	\$2.00	\$10.00	\$80.00
“ “ 4 to 5 ft.....	20	1.50	8.00	60.00
“ “ 3 to 4 ft.....	15	1.00	7.00	50.00
“ “ 2 to 3 ft.....	10	70	5.00	30.00
“ “ 1 to 2 ft.....	8	60	4.00	20.00

New Varieties, Hale, Myer's Early Elberta, Gold-Finch, double above price.

Cambridge, Myers's Yellow-Jack, \$1.00 each, 3 to 4 feet.

The prices are for one variety only, but 5, 25, or 100 of a sort will be allowed at the 10, 100 and 1000 rates.

Myer's Elberta

The Plum likes strong land, but succeeds on dark soils and almost any soil that is made rich. For the best results it requires thorough and high cultivation. It needs spraying to insure against leaf diseases and the trees need to be jarred to protect them from the curculio. So many careless and indifferent growers will always neglect these precautions that the thorough culturist will practically have a monopoly of the market.

There are a large number of most excellent plums for garden culture, but which are not adapted to commercial orchards. The market requires early and late ripening kinds to command the highest prices.

1 and 2 year standard sorts—ask for 1000 rates.

GOOSEBERRIES

1 and 2 year standard sorts 25 2.00 10.00 50.00

RASPBERRIES

St. Regis

An everbearing variety of unusual merit. A red raspberry that gives ripe fruit earlier than any other kind, and continues to do so continuously until ground is frozen. Every family should have 50 or more plants.

Every year we gather fruit of it in abundance until well into November and when freezing weather came, the canes were heavily laden with ripe and ripening berries. The berries are good size, bright crimson, exceedingly firm and of sweet, rich flavor.

Prices

Transplanted plants, dozen, 75c; 100, \$3.00; 1000, \$20.00.

	Each	10	100	1000
St. Regis Everbearing—the best red	10	50	2.00	10.00
Old standard sorts, red and black	1.50	10.00

BLACKBERRIES

The Joy Blackberry

Brings joy to all who grow, sell, or eat it. Unites superlative quality, ironclad hardiness and great productiveness.

"It's immense!" That is what several persons have said when seeing the Joy Blackberry in bearing for the first time. It is an appropriate exclamation: for the berries of Joy are not only of very large size but this blackberry is truly "immense" in every way—in enormous yield, in vigorous growth and heavy leafage, in beauty of color and form, in quality. The season just past it was finer and better than ever before. In fact it has proved to be so far superior to all other blackberries that I would not accept as a gift plants of any other variety if I could obtain plants of the Joy at \$25.00 a hundred—much less at the price at which they are now offered.

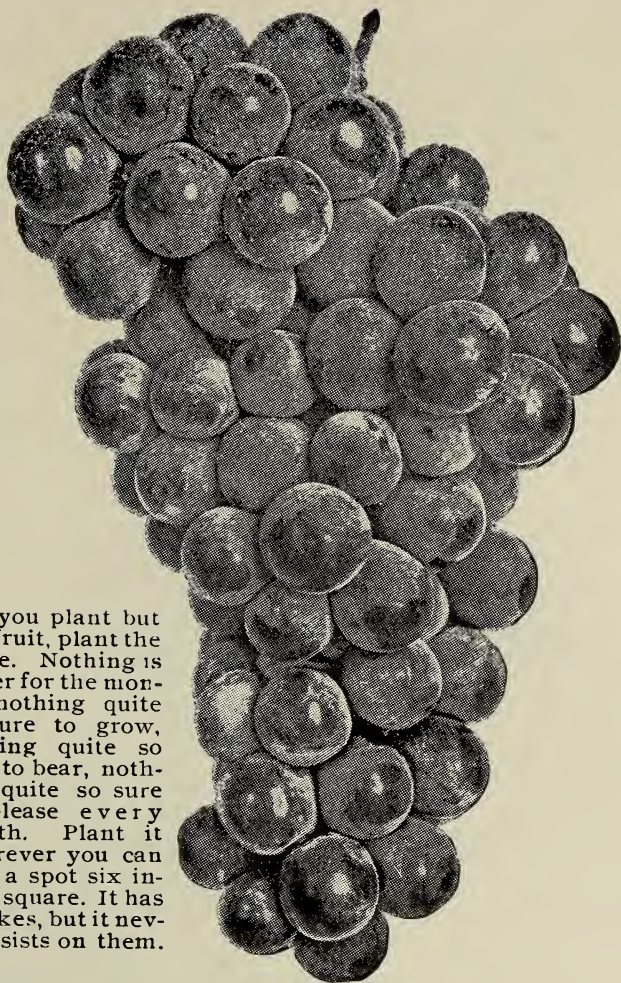

It may be briefly described as follows: The canes are of stocky, vigorous habit—so stout and strong it needs no staking—with abundant large fingered leafage; yields very heavily every year and all the canes are loaded with fruit; (I have never known any variety, Blackberry or Raspberry, with such an inherent propensity to bear fruit as the Joy Blackberry).

The canes are ironclad hardihood; never to my knowledge having been injured by cold.

Prices

	Each	10	100	1000
Old standard sorts	2.00	10.00
Joy —the best of all	20	1.00	5.00	30.00

GRAPE VINES

If you plant but one fruit, plant the grape. Nothing is better for the money, nothing quite so sure to grow, nothing quite so sure to bear, nothing quite so sure to please every mouth. Plant it wherever you can find a spot six inches square. It has its likes, but it never insists on them.

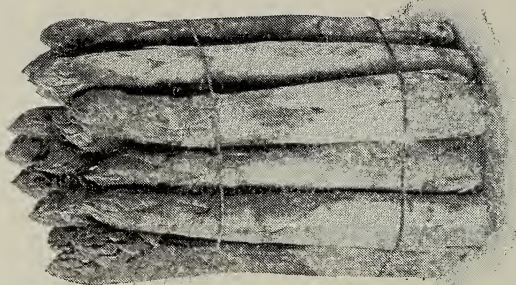

Caco

Caco Grape. The most delicious of all grapes, ripens ten days to two weeks ahead of Concord. So rich in sugar it is excellent in flavor. Two weeks in advance of being fully ripe. Vine strong, vigorous grower, healthy and prolific strong vines, 50c each, \$5.00 per dozen.

Prices

All other nut trees	75	5.00

Myer's Imperial Gem Cantaloupes

To the cantaloupe growers of the country for market purposes we believe this variety will be what the Elberta peach has been to the fruit growers of all sections.

This large, solid, netted melon is perfect in shape, packs nicely and shows up well in the package; in fact, better than any we ever saw, being netted all over and running mostly of a jumbo size. It bears heavy crops of the most delicious flavored melons imaginable, far surpassing in all respects our most noted standard sorts. Without doubt it will command the very highest market price as a

CANTALOUPE—Continued

fancy melon, and will be sought after by the leading Hotels and Restaurants of the country when it is put on the market and becomes generally known. Compared with other sorts we know that after a trial the result will be unanimous in favor of Myer's Imperial Gem. $\frac{1}{4}$ lb. \$1.50, $\frac{1}{8}$ lb. \$3.00, 1 lb. \$5.00.

Cantaloupe seed grown in Colorado has, beyond a doubt, proven to be the best seed obtainable. The climate conditions of that state seem to suit this purpose better than other states, and realizing this fact we have decided to add a seed department to our nursery business, and to give our customers the best seed possible to be obtained.

We have our seed grown under contract in the state of Colorado. No melons are shipped or sold by our seed producers, and nothing but first-class melons are used for seed.

Quality and not price should be the guide in buying seed. One of the most important factors in the production of a good, marketable crop of cantaloupes is good seed.

Seed saved from fields grown from carefully-selected stock seed is the best. The seed should be harvested from healthy vines during the early part of the season, from fully-matured melons of perfect shape, uniform size, heavily-netted, thick-fleshed with small seed cavity. Seed so selected cannot be sold at a low price. During the period when seed should be saved cantaloupes generally bring the highest prices on the markets. On an average a standard crate of cantaloupes will cut about a pound of seed. Many melons that will do to ship cannot be saved for seed; for in the best-bred strains and under the best conditions the melons will vary in size, form and density of netting. From the best seed procurable such variations will be found, but the better the grade the smaller the per cent of irregularities.

Our object is to supply those who appreciate and want the best seed that can be grown; those wanting cheap grade of seed will have to buy elsewhere, for we will handle nothing but the best.

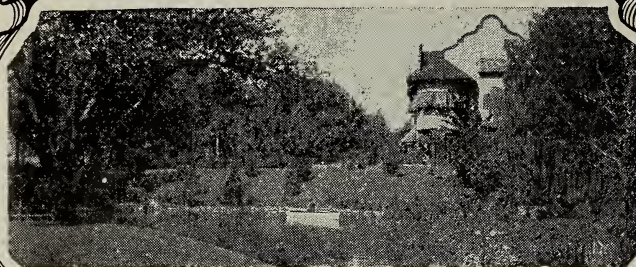

We are only having three varieties of cantaloupe seed and two of watermelon grown for us, and we have no other sorts of any kind of seed for sale this year. **Indian Chief** and **Tom Watson**. Price on application.

PRICE OF SEED.

Netted Rock King. The variety that has made Delaware famous as a melon growing section.

Two of the best known strains of the improved "Rocky Ford" or solid net type—rust resistant,
 $\frac{1}{2}$ lb. \$1.00, 1 lb. \$1.50, 5 to 10 lbs. \$1.35.

ORNAMENTALS

A. Dasycarpum Wierii. Wier's Cut-Leaf Silver Maple. This is a beautiful form of the Silver Maple. Leaves deeply cut and delicately divided; branches drooping, frequently touching the ground. A rapid grower and a very effective and popular variety for lawn and park planting. Height, 35 to 40 feet.

Prices:	Each	10	100
6-8 ft., budded, well-branched..	\$0.75	\$5.00	\$40.00
5-6 ft., budded, well-branched..	.50	4.00	30.00

A. platanoides. Norway Maple. European species of compact and rapid growth; foliage deep, shining green. A most desirable shade tree. In many localities the Norway Maple is considered the best of all for street and park planting because of its sturdy growth, handsome form and beautiful foliage. Height, 40 to 50 feet.

Prices:	Each	10
10-12 ft., 1½-1¾ in caliper.....	\$2.00	
8-10 ft., 1¼-1½ in. caliper	1.25	\$10.00
6-8 ft., stocky75	6.00

A. saccharum. Sugar or Rock Maple. A magnificent variety for street and lawn. The tree assumes a dense habit of growth; foliage dark green, in autumn, assuming beautiful shades of scarlet and yellow. Very hardy. Height, 50 to 60 feet.

Prices:	Each	10
10-12 ft., 1½-1¾ in. caliper	\$2.00	
8-10 ft., 1¼-1½ in. caliper	1.25	\$10.00

STRAWBERRIES

Myer's Special Select list of Strawberry plants grown on new land with fine root system. Our plants should not be compared with some of the cheap, small plants sent out by many growers, as they are twice as large and more prolific than those that you could secure elsewhere.

Aroma. Per. Late, large, conical or round, excellent quality.

Bubach. Imp. Medium early, berries large, thick, meaty, fine.

Bridgeville. Imp. This is one of the largest and finest imperfect sort. We have seen; try it and you will not be disappointed.

Charles I. Per. Extra early, very large, the best early sort.

Crescent. Imp. Medium early, medium size, bright red, heavy yielder.

Early Jersey Giant. Per. One of the largest early sorts.

Gandy. Per. Late, well known as the great late market sort.

Haverland. Imp. Immense yielder of long, large, red berries.

STRAWBERRIES—Continued

- Joe Johnson.** Per. This most valuable strawberry ripens with the Chesapeake; equals it in size, firmness and yield; much better plant maker.
- Kelloggs Prize.** Imp. Very fine, large, good color and quality.
- Late Jersey Giant.** Per. A large and very late variety, beautiful.
- Myer.** Imp. Mid-season, Delaware's great market berry.
- Sample.** Imp. Large size, fine quality, bright color, yields heavy.
- Senator Dunlap.** Per. A standard market sort the country over.
- Superior.** Per. Early, medium size, bright red, heavy cropper, runs down soon.
- Tennessee Prolific.** Per. This is an old reliable sort well known.
- Townsend.** Per. Late. Very much like Aroma, but better plant maker.
- Woolverton.** Per. A beautiful bright red, perfect shape, great market sort.
- Brandywine.** Per. Late. Abundance of large berries, good color and shape. Heavy and profitable bearer.
- Chesapeake.** Per. Late. Fruit large, firm, and without green tips; does best in rich, damp land.
- Climax.** Per. Extra early; large; dark red; conical, with glossy surface; prolific fruiter.
- Early Ozark.** Per. Berries large, firm, good for shipping. Ripen early in season.
- Excelsior.** Per. Early. Large, firm, high colored and well shaped. Immensely productive.
- Fendall.** Per. Midseason. Strong, vigorous. Berries equal any in size; delicious flavor and extra-fine color.
- Lady Thompson.** Per. Early. Berries medium to large, regular, glossy pink, solid meaty; excellent.
- Missionary.** Per. Early. Medium size; good color and fine flavor.
- Michel.** Per. Extra early. Healthy, rampant, many crowns; berries scarlet, rich, mild, acid.
- Parsons.** Per. Ripen midseason and continue until Gandy comes in. Dark red, thick, blunt, fine flavor.
- New York.** Per. Medium to late. Abundant, extra-large, dark shiny berries.
- Warfield.** Imp. Early. Berries glossy, dark red, rich, juicy and firm. Fine in the West.

Van Fleet Hybrid Strawberries

A new and distinct variety of strawberries:

Undoubtedly, no other strawberry has ever had so many nice things said about them. Not only are these hybrids unrivaled for home garden, but have proved to excel all other varieties in cultivation as commercial strawberries, due to vigor of plant, prolific yielder, large size, beauty and good marketing properties.

Van Fleet No. 7, No. 10, No. 13, No. 14 all perfect bloom, price \$1.00 per 100.

Abington, Barrymore, Abundance, price, \$1.00 per 100.

General Price List

Parcel Post. Plants can be sent by parcel post, prepaid, at one-half cent per plant extra.

***Imperfect flowering varieties, and should be planted with perfect flowering sorts.**

Celebrated Gandy Strawberry

Perfect flowering. The latest of all Strawberries we grow. Yields tremendous crops of a quality that leaves nothing to be desired in flavor, texture, color and keeping qualities. Berries bright red, with somewhat smooth surface. Foliage broad and dark green. Berries are borne on long, upright stems, well above the surrounding soil. As a late market sort and long-distance shipper, it is the best kind we have grown. Plant is perfect bloomer, but should be set near other bisexuals. The heaviest crops and most perfect fruit will grow on rich bottom-land.

The World Renowned Klondyke Strawberry

One of the
most popular and
profitable berries
on the market

Perfect flowering; early. Berries uniform, shapely, dark red, very juicy, handsome, sell quickly. Plants make a remarkable growth, are tall, compact, stalks strong, leaves light green; make abundant runners and an unusual number of crowns. Yields are wonderful. Blossoms are perfect, but do not fully fertilize themselves, and need other sorts near. If you could see the loads of Klondyke that are brought to Bridgeville and other points, during the berry season, you would realize that this is an extremely popular and profitable sort.

MYERS YELLOW

Seed Corn. We are offering for the first time a yellow variety of Delaware seed corn which we believe superior to any yellow sort introduced. It matures early and is large on medium land, will outyield anything we ever had. Try some and you will think **Myers Yellow** the best. Price, peck, \$1.00; ½ bushel, \$2.00; 1 bushel, \$3.00; 2 bushel, \$5.00.

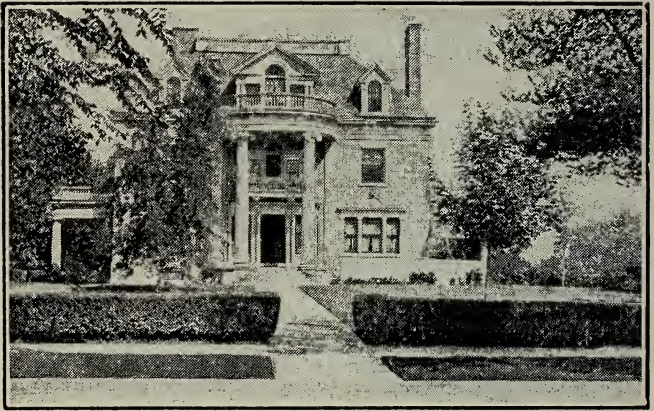

A FARM AT A BARGAIN

FRUIT, TRUCK, POULTRY

and grain farm, at a bargain price. 76 acres, one mile of Bridgeville, Delaware. 2000 young peach trees, 800 pear trees, 15 acres in young pine timber on north side. Other business demanding our time. Cannot look after it, and will sell at a sacrifice. This land is adapted for any kind of crops and especially for early truck of any kind. Cantaloupes, watermelons, sweet potatoes, strawberries, peaches, pears and apples. Anyone wanting a farm of this kind cannot find one in this state the equal for the price we ask.

Ask for special prices on California Privet, Cow Peas, Watermelon Seed or anything else not listed in this catalogue.
